Accessibility Profiles

Blind

Blind Profile allows your website visitors to access the website using screen reader and keyboard navigation. Blind profile activates features such as:

 Talk & type

 Screen Reader

Elderly

The Elderly profile is designed to enhance accessibility for older adults. It activates features such as the Big White Cursor, Text Magnifier, Stop Animation, Highlight Focus, Reading Guide, Content Scrolling, and Smart Contrast to improve readability and ease of use. Elderly profile activates features such as:

 Content Scrolling

 Text Magnifier

 Big White Cursor

 Stop Animations

 Highlight Focus

 Reading Guide

 Smart Contrast

Accessibility Profiles

Motor Impaired

Users with Motor Impairment have difficulties to access websites with mouse and keyboard. This profile provides options that can make site navigation much less complicated. Motor Impaired profile activates features such as:

Text Magnifier

Stop Animations

Visually Impaired

Someone who has partial vision loss or has difficulties in reading, this profile provides suggestions that can be helpful for a variety of conditions. Visually Impaired profile activates features such as:

Text Magnifier

Big White Cursor

Stop Animations

High Saturation

Readable Font

Smart Contrast

Accessibility Profiles

Color Blind

Individuals with color blindness see colors differently than normal people. The available group of features provides relevant suggestions. Color Blind profile activates features such as:

 Deuteranomaly

Dyslexia

Dyslexia is a learning disorder that involves difficulty reading due to problems identifying speed sounds and learning how they relate to letters and words. Dyslexia profile activates features such as:

 Stop Animations

Df Dyslexia Font

Cognitive & Learning

 Stop Animations

 Reading Mask

 Text Magnifier

Accessibility Profiles

Seizure & Epileptic

Flashing page elements, animations and videos can sometimes trigger seizures in people with epilepsy and similar conditions. Seizure & Epileptic profile activates features such as:

 Stop Animations

 Low Saturation

ADHD

By selecting this profile, it help visitors to stay focused as they move through a webpage. The recommendations included in this profile may help alleviate distractions to improve reading comprehension. ADHD profile activates features such as:

 Stop Animations

 Reading Mask

 Low Saturation

Color Blindness, Voice Commands

Color Blindness Setting

Color Blindness feature helps users to change website colors according to the color vision deficiency they have. The following 8 types of color blindness settings are available:

1. Protanomaly,
2. Deuteranomaly
3. Tritanomaly
4. Protanopia
5. Deuteranopia
6. Tritanopia
7. Achromatomaly
8. Achromatopsia

Voice Navigation

Navigate the website effortlessly with Voice Navigation, enhancing user experience through voice-

Libras and Talk & Type

Signmadeeasy - American Sign Language

Feature is used as American Sign Language. The beta version will be launched in the early 4th quarter of 2024.

Libras (Brazilian Portuguese only)

Libras (Brazilian Portuguese only) feature is used as a sign language for hand and arm movements, facial expressions, and body positions to convey meaning. Sign language is a native language for many people who are deaf, and some who don't understand written language well.

Talk & Type

Talk & Type accessibility feature that empowers users to fill forms effortlessly using their voice. Say farewell to typing struggles and hello to seamless form completion with intuitive speech recognition technology. With Talk & Type, accessibility is at the forefront, ensuring everyone can navigate forms with ease, regardless of disability or typing limitations. Embrace a more inclusive digital experience today.

Analytics Tracking

Google Analytics Tracking

Enter GA4 measurement ID to track information about its usage on the website, number of profile clicks, and more.

Adobe Analytics Tracking

Enter Adobe Tracking ID to see information about its usage on the website, number of profile clicks, and more.

Screen Reader

Read Page

Allows a voice to read the text on your site out loud to visitors.

Reading Mask

The reading mask improves concentration on specific content. By putting up reading mask, it will highlight the page elements which are underneath the cursor.

Read Mode

Convert a page into reader-friendly form - text only!

Reading Guide

By enabling reading guide feature, it will convert the cursor into a sharp contrast horizontal reading guideline which helps to reduce eye strain for users who are cognitive, visual, dyslexic, and Presbyopia disabilities.

Skip Links

Skip to Menu

It will allow quick access to the footer on the page.

Skip to Footer

It will allow quick access to the footer on the page.

Skip to Content

Puts a webpage in a text only, reading-focused mode.

Open Accessibility Toolbar

Open Accessibility Toolbar to enable accessibility features based on your requirements.

Content Adjustments

Content Scaling

It allows users to scale visual content including images, text, graphs, illustrations, etc. to zoom in and zoom out.

Readable Fonts

By clicking on this, it will replace any fancy fonts with simple readable fonts.

Highlight Links

It focuses on links, buttons, and other action elements in high contrast colors which are easy to recognize. Also, highlight clickable components for better and easier website usability and accessibility.

Dyslexia Fonts

Dyslexia Friendly Font enhances readability for those with dyslexia and provides an easier and more fluid reading D experience that is tailored to site visitors with dyslexia.

Highlight Title

It will highlight the titles and help users and assistive technology to understand the structure of the page and its components.

Text Magnifier

Text Magnifier works as a virtual magnifying glass which allows to enlarge the selected text area.

Adjust Font Sizing

Font size can be adjustable according to users requirements.

Adjust Letter Spacing

Text and line spacing can be modified, thus, dyslexic, and visually impaired users get benefit. All in One Accessibility™ offers a significant level of adjustment for a readable and personalized experience.

Align Center

For more personalized and accessible experience, it will allow to change the alignment of the text at center.

Line Height

Get more comfortable spacing for all on-site text with the Adjust Line Height option.

Align Left

For more personalized and accessible experience, it will allow to change the alignment of the text at left.

Align Right

For more personalized and accessible experience, it will allow to change the alignment of the text at right.

Color and Contrast Adjustments

High Contrast

Increase the contrast of all website elements with a High Contrast color theme. It will sharply contrast all elements, texts, buttons, and form fields with one click.

Smart Contrast

With the "Smart Contrast" feature, your website's colors will meet ADA compliance standards, significantly enhancing the visibility of your content.

Dark Contrast

Increase the contrast of all website elements with a Dark Contrast color theme. It will dark contrast all elements, texts, buttons, and form fields with one click.

Monochrome

Transform the website to a monochrome color scheme (black, white and grey); so, the people with color blindness can easily access the website content.

Light Contrast

Set up light contrast of all website elements with a Light contrast color theme. It will low contrast all elements, texts, buttons, and form fields with one click.

High Saturation

Select these High Saturation option to set the intensity of website colors to high.

Low Saturation

Select these Low Saturation options to set the intensity of website colors to low.

Invert Colors

Complete color inversion for all site components, provide enormous color depth, which makes texts easier to read for color blind and visually impaired people by reducing the eye strain.

Adjust Text Color

Text Colorization allows to change the text color of all the elements from the provided colors.

Adjust Title Color

Title Colorization allows to change the title color of all the elements from provided colors.

Adjust Background Color

Background Colorization allows to change the background color of all the elements from the provided colors.

Orientation Adjustments

Hide Images

By enabling this feature, it will hide all images of site and displays the text only.

Highlight Focus

It will highlight focused elements when any user tries to navigate any pages using keyboard.

Big Black Cursor

It enhances the cursor size significantly to make sure that the pointer always stays in sight. Moreover, the bigger cursor allows the faster and more accessible navigation through tabs, form elements, and hyperlinks.

Stop Animation

It helps in pausing the content that moves or auto-updates. Moreover, stops content blinking, flashing, and animations that can trigger seizures.

Mute Sounds

It allows you to mute the sounds from the website.

Highlight Hover

It allows to keep users' attention by highlighting the area where user is hovering.

Big White Cursor

It enhances the cursor size significantly to make sure that the pointer always stays in sight. Moreover, the bigger cursor allows the faster and more accessible navigation through tabs, form elements, and hyperlinks.

Filter Content

Quickly reveal page headings, landmarks and links in a clear, structured, easily navigable and accessible manner. It helps users to find the content they want faster.

Others/Misc

Accessibility Statement

Accessibility statement helps your users to understand the current status of your website's accessibility as well as any accessibility related efforts your business is doing currently.

Hide Interface

Hide the accessibility interface, user won't be able to see it anymore, unless they clear their browsing history and data.

Image Alternate Text

It provides a list of recommended alt text based on AI, remediated image alt text list, decorative images from where you add missing alternate text and update them as per requirement.

Multi Language

Select your preferred language from 140+ available languages or keep the default <<auto detect>> for your accessibility widget.

Virtual Keyboard

All in One Accessibility™ provides an on-screen virtual keyboard to eliminate the need for physical keys. A virtual keyboard ensures an alternative input mechanism for users with disabilities.

Dashboard

SKYNET TECHNOLOGIES

Custom Widget Icon Size for Desktop and Mobile

Select widget icon size for your website according to your preference for desktop and mobile.

100 PX

Custom Widget Position

Select widget position for your website according to your preference.

0 PX To the left

0 PX To the top

Automated Accessibility Compliance Report

Automated Accessibility Scan report includes accessibility score, list of remediated violations, and list of violations that require manual actions.

Accessibility Score

Accessibility Score is based on an automated accessibility scan algorithm that compares your site's accessibility against a comprehensive WCAG rule set.

Manual Image Alt Text Remediation by Website Owner

AI will automatically remediate missing image alt text. Alternatively, website owners can manually add alternative text descriptions to images using All in One Accessibility Dashboard. This feature ensures that visually impaired users can access meaningful descriptions of images, enhancing their overall browsing experience and complying with accessibility standards.

Add-Ons

1

White Label and Custom Branding

\$10/Month

Remove the Skynet Technologies logo as well as all of the footer links, popups, report a problem link and more for full white label control.

2

Live Website Translations

From \$50/Month

Instantly translate your site into 140+ languages to make it more accessible for non-native speakers, people with language acquisition difficulties, and people with learning disabilities.

3

Modify Accessibility Menu

\$250/Year

Build and fine-tune your widget with the Modify Menu option. Reorder, remove and restructure the widget buttons to fit your users' specific accessibility needs.

Add-Ons

4

Manual Accessibility Audit From \$2500

An accessibility audit is a thorough evaluation of a website's compliance with accessibility standards. It assesses how well a website meets the needs of people with disabilities and complies with the Americans with Disabilities Act (ADA) and Web Content Accessibility Guidelines (WCAG).

5

VPAT/ACR Report From \$2500

The Voluntary Product Accessibility Template (VPAT), also known as an ACR (Accessibility Conformance Report) starts with an audit and provides current details for an accessible website, application, or any other digital assets.

6

PDF/Document Remediation From \$5/Page

The PDF / Document Remediation provides a list of inaccessible PDFs and remediated PDFs from where you can request PDF remediation service.

It improves website accessibility for the following global standards
